Timeline of Enrollment Procedures for New International Students

International students without a valid status of residence in Japan must obtain a visa permitting enrollment at a Japanese graduate school by the time of enrollment procedures. Usually it takes at least 3 months (sometimes more) to get your visa after the announcement of the examination result. Therefore, we strongly recommend that you choose an enrollment date that gives you plenty of buffer time when you apply to our graduate school.

Below is a flowchart of the enrollment process after the announcement of the examination result.
